**Capability Summary:**

Proton Data Security, LLC, a minority owned small business, is a proven leader in the areas of research & development, manufacturing, training and technical support of patented degaussing, destruction and shredding systems designed to destroy physical data on all types of data storage media in compliance with DoD 5220.22-M NISP. Proton systems have been thoroughly tested by the NSA since 1987 and many products are currently being used by agencies within the DOD and can be found on the NSA evaluated products list. All Proton declassification products are manufactured in the USA and meet or exceed the requirements of DOD standards for electronic data destruction.

**Additional Comments:**

Members of Proton's management team have extensive experience working with local, state and federal government agencies and government contractors. Proton is dedicated to the protection of classified and unclassified information at the end of the data cycle and leads the field in data destruction and security systems. The company continues to introduce new innovative products through research and development to keep pace with the rapid increase of new data storage device.

DOD, USAF, US Army, DOE – SNL, General Dynamics, Northrop Grumman, Dow Chemical, and IBM are a few examples of past and current clients.
