

## eData Destruction, Compliance, Innovation

**What are your agency's current policies and procedures for the disposal of data or old data devices? Where do they go? Who is responsible for their proper disposal? Is your agency in compliance? As a contractor to the government is your business in compliance?**

**Proton Data Security**, a minority owned small business, is a leader in the areas of R&D, manufacturing, training and technical support of degaussing, destruction and shredding systems for all types of data storage media. Proton systems have been thoroughly tested by the NSA since 1987. Many products are currently used by agencies within the DoD and can be found on the NSA evaluated products list. All Proton products are manufactured in the USA and meet or exceed DoD standards for electronic data destruction.

### Proton 1250<sup>TM</sup> CD & DVD Declassifier

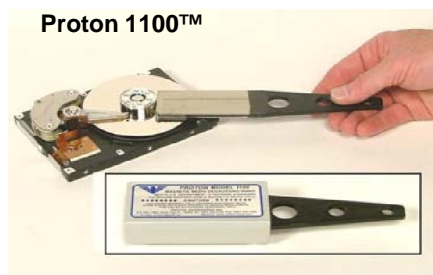

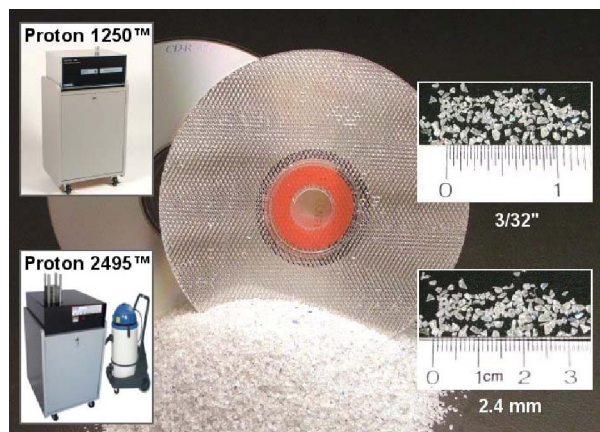

- Provides the ultimate remedy for data control for writable, re-writable and CD and DVD media.
- Employs "micro indentation"; penetrates the data surface of target media; destroys the focal plane and readable data.
- Patented.

### Proton 2495<sup>TM</sup> Automatic Declassifier

- Incorporates autoloader capable of handling 200 discs at a time, processing 1000 discs per hour.
- Grinds CDs & DVDs into small **recyclable** bits.

### Proton 8000<sup>TM</sup> Hard Drive and Magnetic Media Degausser

- Table-top model degausses drives up to 500 GB in **30 seconds**.
- More efficient than software erasure which can take up to 24 hours for one hard drive.
- Erases computer disk and tape media formats as well as broadcast/video media including VHS, U-matic and Beta SP.
- Provides a powerful degauss field with a 20 minute on/off cycle.
- Weighs only 65 lbs; competitive products weigh up to 420 lbs.

Proton has product lines to destroy data for various media formats (VHS, floppy disks, and reel-to-reel tapes) and the expertise to design and implement policy and procedures for data destruction specific to your needs.
